3. In the vicinity of Slatina there were three underground shelters which had electricity and water. The shelters, which could accommodate 1,000 to 1,500 persons, were for the people of Sofia. Three new shelters were built and the old ones improved in the village of Boyana, south of Sofia. These shelters had offices and beds, and were to be used by government officials and by generals and their staffs.
4. It was rumored that Tsola Dragoycheva, the Minister of Post, Telegraph and Telephone, went to the Soviet Union in May 1951.

It is situated in the center of a large yard, 800 by 500 meters, surrounded by a wall about two and one-half meters high. Outside of the yard there are three four-story buildings which are used as offices. About 150 workers, in addition to apprentices, produce vehicle motors only. Many of the vehicles sent to the factory for repairs remain there for a considerable time because there are no spare parts. The factory is guarded by fifteen soldiers, and only employees are permitted to enter.
